

News Letter Sept 2009

Hello Members

This is your newsletter for September 2009 as many of you are aware a few members went in for operations due to health problems. Well this to inform you all that they are all out after the ops and doing fine. Wee art. Clyde. Ian Coaker.

As you all know we got new safety barriers for your protection. From what I have seen when I am up their they don't get used very much. So for your own safety start to use them

A few members have had a few new models out flying the last couple of months with great success in flying them their was one that had never flew for about 20yrs and even that flew great so keep up the good work lads and get them out every chance you get.

We had a club meeting this month at Clyde's shop which was great and it saved the club money as Clyde put on the tea and buns at his own expense for all who attended. Thanks for that Clyde and I hope you do it again

As many of you are aware I have been looking for another field for the club to fly as many of the older members are getting a bit on the stiff side going up and down the hill this is taking its toll on them and they are not coming out as often. I was offered a field in Balmore near Torrance. But after a few committee members had a look at it they said it was no good for us. So it's back to the drawing board for me and any other members who would like to take part in looking for another field for us to fly from

The weather has played a big part in this years flying. Wet and more wet. So let's get some flying done if the weather is good. Get yourself out their

The grass again come on lads take your turn in cutting it. It's the same people again that's doing the job so why don't you give them a break and take a turn in cutting it. I am sure you would not like to take off and land in long grass so give it a go.

This will be the fifth newsletter I have put out this year since I took the job on and I have found it to be not to bad. I have also got a forum going for the club that has had its ups and downs with a few members poking at each other at the start but it has calmed down now and we are all getting on very good now. The committee said they would give the forum a year to see how it was going and decide if they will keep it or not. This will be decided at the AGM in December to see if it goes or stays that will be up to you on its future.

Lastly lads when crossing the road with your models and boxes please take care when crossing. as some maniacs drive to fast and overtake so we don't want any of your planes to get damaged

Well that's it for now lads. I will get one more newsletter out just before the AGM so keep up the good flying and remember to check your plane out before you fly
